

WATER HYGIENE TECHNICIAN

We are looking to appoint a Water Hygiene Technician to be based at our Southern office in Aldermaston, Berkshire.

This division specialises in the monitoring of water and environmental quality in commercial and industrial buildings. Sites are based predominately in the south typically within the M3/M4 corridor and within and around the M25.

Key tasks and responsibilities:

- Chemical analysis and sampling and inspection works to a wide range of building services
- Closed system analysis of LTHW and CHW and interpretation.
- Temperature monitoring
- Shower cleaning
- Thermostatic mixer valve servicing
- Water sampling and inspection works.
- Preparing schematic drawings for domestic and other water systems
- Communicate and liaise verbally and in writing between customers / suppliers / visitors / enquirers and relevant staff

Attributes:

- You will need to be honest, confident, flexible, well-motivated and committed to meeting client deadlines, with an ability to work independently and as part of a team
- Be physically fit as the role requires; the use and carrying of ladders, working in restricted spaces and carrying of equipment.
- Maintain regular consistent and professional attendance, punctuality, personal appearance, and adherence to relevant health & safety and quality procedures
- Must be flexible with regards to travel and overnight stays where necessary

We offer a highly competitive remuneration package, including access to a company vehicle, and pension plan.

All positions are subject to a full clean UK driving licence, enhanced DBS (formerly CRB) clearance, proof of qualification/experience, and satisfactory references.

Please forward your CV to jobs@first-environment.co.uk for the attention of Laura Stokes.
